

INFORMATION ABOUT EATING FISH FROM FALLEN LEAF LAKE (EL DORADO COUNTY)

Office of Environmental Health Hazard Assessment (OEHHA)
California Environmental Protection Agency
May 2020

Why did OEHHA develop an advisory for eating fish from Fallen Leaf Lake?

OEHHA developed an advisory for Fallen Leaf Lake because of mercury found in Lake Trout caught from this water body. Fallen Leaf Lake is located in El Dorado County just south of Lake Tahoe and west of the city of South Lake Tahoe, near the California-Nevada border. This advisory is part of an ongoing effort by OEHHA to provide safe-eating advice for fish in different California water bodies.

Why should I eat fish?

- Low-contaminant fish, like the Lake Trout found in Fallen Leaf Lake, are an important part of a healthy, well-balanced diet. The American Heart Association recommends eating at least two servings of fish each week.
- Fish are a good source of protein and vitamins, and are a primary dietary source of heart-healthy omega-3 fatty acids. Eating low-contaminant fish while pregnant may help the baby's brain develop.

Which chemicals are of concern for people eating Lake Trout from Fallen Leaf Lake?

- Mercury
 - Mercury is a metal that comes from natural sources, mining, and air fallout from burning coal and other fuels. It is the most commonly found contaminant in fish.
 - Too much methylmercury, the form of mercury found in fish, can harm the brain, especially in fetuses, babies, and children. Mothers can pass methylmercury to their babies during pregnancy.
 - Because fetuses, babies, and children are especially sensitive to mercury, OEHHA has one set of advice for the amount of mercury-containing fish that women age 18-49 years and children should eat, and another set of advice for women 50 years and older and men 18 years and older.

How did OEHHA determine the consumption guidelines for Lake Trout from Fallen Leaf Lake?

- OEHHA compared chemical levels in Lake Trout caught from Fallen Leaf Lake to levels that are considered safe for human consumption.

- OEHHA's consumption guidelines balance the risks and benefits of fish consumption.

What does OEHHA recommend for people who want to eat Lake Trout from Fallen Leaf Lake?

- OEHHA recommends the amounts and types of fish that may be eaten each week as "servings." A serving is about the size and thickness of your hand for fish fillets. Give children smaller servings. For smaller fish species, several individual fish may be required to yield a serving.
 - Women 18-49 years and children 1-17 years may eat two total servings per week of Lake Trout.
 - Women 50 years and older and men age 18 years and older may eat four total servings per week of Lake Trout.
- For additional fish species found in Fallen Leaf Lake and not included in this advisory, OEHHA recommends following the [statewide advisory for eating fish from California's lakes and reservoirs without site-specific advice.](#)

What else can I do to protect my health and the health of my family?

- Eat a variety of fish.
- Eat smaller (younger) fish of legal size.
- Eat only the skinless fillet or meat portion of fish.
- Thoroughly cook the fish, allow the juice to drain away.
- Learn about OEHHA's guidelines for eating sport fish in California:
 - Visit <https://oehha.ca.gov/fish/advisories>, or call OEHHA at (916) 324-7572 or (510) 622-3170.
 - Check the Freshwater or Ocean Sport Fishing Regulations booklets from the California Department of Fish and Wildlife, or visit <https://www.wildlife.ca.gov/Regulations>.
