

**CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF ENVIRONMENTAL HEALTH HAZARD ASSESSMENT**

**SAFE DRINKING WATER AND TOXIC ENFORCEMENT ACT OF 1986
(Proposition 65)**

**NOTICE TO INTERESTED PARTIES
March 19, 1999**

CHEMICALS LISTED EFFECTIVE **March 19, 1999
AS KNOWN TO THE STATE OF CALIFORNIA
TO CAUSE REPRODUCTIVE TOXICITY**

The Office of Environmental Health Hazard Assessment (OEHHA) of the California Environmental Protection Agency is adding the two chemicals named below to the list of chemicals known to the State to cause reproductive toxicity, for purposes of the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65 or the Act). These chemicals are listed effective **March 19, 1999**. The two chemicals are listed pursuant to an administrative mechanism provided under the Act, based upon a formal identification by an authoritative body that the chemical causes reproductive toxicity. Regulations governing the listing of chemicals under the “authoritative bodies” mechanism are published in Title 22, California Code of Regulations, Section 12306.

The reader is directed to the *Notice of Intent to List Chemicals* published in the December 4, 1998 issue of the *California Regulatory Notice Register* for the supporting documentation which OEHHA relied upon in making its determination that the criteria for administrative listing have been satisfied. A complete, updated chemical list is published elsewhere in this issue of the *California Regulatory Notice Register*.

The two chemicals listed effective **March 19, 1999**, and the mechanism under which each is listed are shown below.

Known to cause reproductive toxicity:

Chemical	CAS No.	Toxicological Endpoints	Listing Mechanism¹
Cycloate	1134-23-2	Developmental toxicity	AB
Linuron	330-55-2	Developmental toxicity	AB

1. Listing mechanism:

AB - “authoritative bodies” mechanism (22 CCR, Section 12306)
