

**CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF ENVIRONMENTAL HEALTH HAZARD ASSESSMENT**

**SAFE DRINKING WATER AND TOXIC ENFORCEMENT ACT OF 1986
(Proposition 65)**

NOTICE TO INTERESTED PARTIES

March 5, 1999

CHEMICALS LISTED EFFECTIVE **March 5, 1999
AS KNOWN TO THE STATE OF CALIFORNIA
TO CAUSE REPRODUCTIVE TOXICITY**

The Office of Environmental Health Hazard Assessment (OEHHA) of the California Environmental Protection Agency has added the two chemicals named below to the list of chemicals known to the State to cause reproductive toxicity, for purposes of the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65 or the Act). These chemicals are listed effective **March 5, 1999**. The two chemicals are listed pursuant to an administrative mechanism provided under the Act, based upon a formal identification by an authoritative body that the chemical causes reproductive toxicity. Regulations governing the listing of chemicals under the “authoritative bodies” mechanism are published in Title 22, California Code of Regulations, Section 12306.

The reader is directed to the *Notice of Intent to List Chemicals* published in the December 4, 1998 issue of the *California Regulatory Notice Register* for the supporting documentation which OEHHA relied upon in making its determination that the criteria for administrative listing have been satisfied. A complete, updated chemical list is published elsewhere in this issue of the *California Regulatory Notice Register*.

The two chemicals listed effective **March 5, 1999**, and the mechanism under which each is listed is shown below:

Known to cause reproductive toxicity:

Chemical	CAS No.	Toxicological Endpoints	Listing Mechanism¹
Diclofop methyl	51338-27-3	Developmental toxicity	AB
Hydramethylnon (Amdro)	67485-29-4	Developmental toxicity Male reproductive toxicity	AB

1. Listing mechanism:

AB - “authoritative bodies” mechanism (22 CCR, Section 12306)
